Sixthlife Search

Sixthlife Search is a WordPress Plugin which helps a Blogger promoting Envato Products by create long articles/ Blog Posts similar to the ones you find at http://sixthlife.net/category/blogs/ .

If you have a WordPress Blog or are about to start one perhaps you want to write a long article listing Envato products. Unique content and theme description need to be created so that search engines do not penalize for duplicate content. You do not want to create a replica of Envato website, their category names and products. This WordPress plugin helps you do all of this, considerably saving your time. It saves 70% of the time needed to create such an article/ Blog Post and still it is customizable as per your Blog's theme.

Installation

1. Upload the folder "sixthlife-search" that is in the purchased files to wp-content/plugins folder on your server. Files can be uploaded with an FTP client like FileZilla.

2. Log into your WordPress dashboard, go to Plugins=>Installed Plugins menu, Activate the plugin.

Configuration

The configuration page is found at Settings->Sixthlife Config in the WordPress Dashboard.

Adjust the Configuration values. **Set the Envato Username** value to your Envato Username so that the referral links generated bear your Envato Username.

*NOTE: If you are using another wordpress plugin that adds the referral url on the fly to Envato Links or are hiding affiliate string using another plugin set the **Envato** username blank.*

Make sure **the Cron values are NOT set to None**, as they fetch the Envato Products from Envato's website. **Save** Your Settings.

Steps to Fetch Envato Products & create An Article/ Blog Post

1. First grab RSS URLS from Codecanyon, Graphicriver, ThemeForest RSS feeds page. A link to RSS Feeds Page is available in the footer section of respective Envato Websites.

2. **Add RSS URLS** at Sixthlife Search=>Envato RSS URLS page.

3. Go to Sixthlife Search=>Envato RSS Themes page. Select one or more rss urls and click "Add RSS Products" button to **fetch the Envato Products**.

4. **Get the Preview Images** for recently added products at Sixthlife Search=>Envato Previews.

    Number of Records suggested value is 5 to 25.

5. The newly added products can be found at Sixthlife Search=>Sixthlife Search menu. You can **edit product descriptions, Preview Images** etc here.

6. **Create an article/ Blog** Post At Sixthlife Search=>Themes Product Post.

Note:Kindly note that step 3 to step 5 are automatically performed by cron jobs/ automatic Fetching and you should set it to hourly on the Config Page at the start when you don't have any products. This will help you build a Envato Product Database quickly. Latter on a value of daily or twicedaily will be fine.

The Logs for The automatic crons fetching products and preview images can be found at Sixthlife Search=>Automatic Logs.These logs are cleared every 7 days.

Creating an Article/Blog Post

1. Log In into the WordPress Admin Dashboard. Go to left menu Sixthlife Search=>**Themes Product Post**.

2. **Enter the Title** of Post Being created. For Example "50+ Flowery Logo Designs"

3. **Add Article tags** For Example flowery,logos

4. **Select a "post category" and set the "status**" of the new WordPress Post that will be created to draft or published.

5. **Set the "Marketplace"** For Example graphicriver in this case.

6. **Set the keyword that the product title or content** should contain For Example flower|flowery in this case.

7. **Set the title content condition to (and/ or).** "and" means flower should be present in both title and content. "or" means flower should be present in either title and content.

8. **Set the "Keyword NOT In Title"** to keywords that should not be present in title or content. For Example: metal&pattern&embroidery

9. **Set "Category Contains"** to a keyword that is partially or fully in a category For Example: Logos

10. **Set the maximum number of products** that should be present in the Article/ Post that will be created. For Example: 50

11. **Click on "Show" to see a preview** of post that will be created.

12. **Each product that shows has a "remove"** button besides it. You can remove a particular product from the Article/ Post being created on the fly by clicking on it.

13. **Select "Finalize and Create A Post if the post does not exist."** Checkbox and Click Download. Check the Posts=>All Posts to see the newly created Article/ Post.

Caution: *Finalize and Create A Post, Delete Old Post. Checkbox can be selected only when you want to delete a Post with same title and create a new one. Use it with caution*. ***It is irreversible****.*
